PROJECTS

Time Series Forecasting using SARIMAX 🔗   Oct 2021 – Oct 2021
Worked on forecasting the closing price of Ethereum, checked for the best fit model, and finally used the SARIMAX model to validate the forecast.

Covid-19 Help App 🔗   May 2021 – Jun 2021
A collaborative project wherein we made use of different machine learning algorithms such as KNN, Decision Tree, Logistic Regression, etc to predict whether a person is covid positive or not by inputting their symptoms. This application also helps to check available vaccination slots (currently for Indians only), visualization of the current covid situation using Tableau, lastly added a feedback form. Currently, the service has been abandoned as the app crossed the free tier limit of AWS.

Analyzing Alcohol Consumption by Students   Nov 2020 – Dec 2020
Individual participation in a globally held competition named USCLAP. The prime focus was to analyze alcohol consumption by students of the University of Minho, Portugal. Made use of data available online and performed statistical analysis.

Report 🔗
